SUMMARY

Detail-oriented QA fresher with practical experience in functional, regression, and UI/UX testing across Agile environments. Proficient in test case design, defect reporting, and API validation using Postman and Jira. Actively learning Playwright (Python) for test automation. Seeking an entry-level QA position to apply structured STLC knowledge and a strong quality mindset.

EDUCATION

- **Master of Science in Data Science (Pursuing)** 2024 – 2026
Nehru Arts & Science College, Coimbatore
- **Bachelor of Science in Computer Science** 2021 – 2024
Nehru Arts & Science College, Coimbatore CGPA: 7.90

WORK EXPERIENCE

- **QA Engineer** Jun 2025 - Oct 2025
Isaii AI — Coimbatore
 - Designed and executed 40+ test cases across mobile and web platforms, covering functional, UI/UX, and regression testing.
 - Performed API testing for authentication, cart, orders, and product modules; created structured bug reports with repro steps.
 - Improved release efficiency by identifying critical defects early and ensuring thorough pre-deployment validation.
- **Data Science Intern** Mar 2025
Christ Infotech — Pune
 - Built an AI-powered College Scoring System analyzing 10,000+ student reviews using sentiment analysis for real-time rankings.
 - Processed and cleaned 1,200+ raw reviews through NLP pipelines, automating scoring and validation workflows.
 - Enhanced model reliability by documenting functional gaps, validating outputs, and improving overall scoring logic.

PERSONAL PROJECTS

- **LLM Hallucination Detection System**
Built an AI quality assurance tool that evaluates and flags hallucination.
 - Built a testing framework to evaluate LLM output quality using Black-Box, White-Box, and LLM-as-Judge testing methodologies — applying structured QA techniques directly to AI model validation.
 - Enabled side-by-side comparative testing of any LLM, providing actionable defect insights to assess model reliability and factual accuracy..
 - Tech Stack: Python, LangChain / LLM APIs, NLP, Vector DBs, Prompt Engineering

TECHNICAL SKILLS

Programming: Python, SQL, HTML, CSS

Tools: Git, GitHub, VS Code, Jupyter Notebook, Postman, Jira, Power BI

QA / Testing: Manual Testing, Functional Testing, Test Case Design, Bug Reporting, UI/UX Validation, API Testing, Automation Testing, Playwright, CI/CD

GenAI / ML: Prompt Engineering, LLM Integration, LangChain, Vector DBs, NLP

Interests: Quality Engineering, Automation Testing, AI Products, Data Analytics, Web Development

CERTIFICATIONS

- **Software Testing & Automation and Manual Testing** May 2025
Coursera
- **Data Science and Analytics** Apr 2025
HP Life and Foundation
- **Career Essentials in Data Analysis** May 2025
